Hi Jean,

Looking at this drawing and where the parts are used, I think this is fine. These clips are used internally on the airframe and riveted on both sides to the structure so that the rest of the CCK can be installed.

Jacob, I will leave it up to you to figure out the deviation portion of this.

Alex

Subject: 647.1911 / .1912

Hi guys,

I'm contacting you about a none conformance on the extrusion that we have for 647.1911/.1912 bracket. This extrusion was purchased a wild ago for these part but we notice recently that the over-all height (2.56") is at 2.512". We have a lot of this extrusion in stock! Can you please confirm if this is acceptable.

If ever you guy's are ok with this none conformance, would it be possible to have a deviation written down so we don't have to fill out an ECR each time we produce these part.

Thank-you.
